

# Instructions

## Use of burning candles or similar products

We would like to once again draw your attention to the fact that burning candles are generally not allowed in the trade fair and exhibition halls. If certain conditions are fulfilled, however, burning candles may be displayed (as exhibits or with candle holders as exhibits) in consultation with the Fire Protection department of the Frankfurt Fire Service.

The conditions are as follows:

1. For safety reasons, candles may only be used behind glass (storm lamp) or in containers filled with water (floating candles).
2. Burning of candles outside the stand is generally prohibited.
3. Care must also be taken when positioning candles inside the stand in order to avoid hazardous situations due to the carelessness of visitors. The candles must be placed at least 0.50 metres away from flammable materials or similar.
4. Burning of exhibited candles in shelving units is prohibited for fire safety reasons.
5. The number of candles used must not exceed the number (2-3) that is appropriate for the purposes of product presentation.
6. Responsibility for consequential damage lies solely with the exhibitor or stand operator. Messe Frankfurt is not liable for any damage.
